I'm a Full Stack Developer focused on creating User Interfaces for web and mobile applications. With over 8 years of experience in development, I currently work as a Senior Frontend Developer at Mercado Libre.

Throughout my career, I have worked with various technologies, which has allowed me to improve my logical and practical approach to problem-solving. I take pride in creating projects with high-quality results and am always looking for ways to improve my skills. In addition to programming, I am passionate about music, and anime, and I am very interested in the topic of cryptocurrencies and blockchain.

If you're looking for someone passionate, with extensive experience in user interface development for web and mobile applications, and committed to continuous learning, please don't hesitate to contact me. I'm excited to continue growing in my career and facing new challenges.
